

Promote

Promote works by activating specific physiological processes within plants

Benefits:

- Increased root development.
- Increased mineral uptake from the soil and into the plant.
- Relieves stress in plants caused by extreme weather conditions, pests and diseases
- Increased turf density and quality

Promote contains high quality carbohydrates, L-amino acids, oligopeptides, polypeptides, alginates, mannitol, oligosaccharides and polysaccharides, yeast extract, natural organic acids & betaines.

All of these components are derived from high quality plant extracts.

Application rates
10-20 litres per hectare

Caution Keep Out of Reach of Children
