

BioFlav-X

New generation of plant biostimulants

PRODUCT

BioFlav-X is a liquid product based on natural plant extracts.

CONDITIONS OF SALE/WARRANTY AND LIABILITY LIMITATION

Aqua-Aid Europe (Seller) warrants that this product conforms to its description and is reasonably fit for the purpose stated on the label when used in accordance with the stated directions under normal conditions of use. Buyer assumes the risk of any use contrary to such directions. Seller makes no other express or implied warranty of FITNESS or of MERCHANTABILITY, and no agent of Seller is authorized to do so except in writing with a specific reference to this warranty.

In no event shall Seller's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.

PACKAGING

1 liter e or 10 Liter e Shake before use
1,5l kg / L (18C) - pH 5 - DS 55% w/w 10 Liter

FERTILIZER VALUE

Urea Nitrogen: 3%
Natural fruit extracts: 15%
Amino Acids: 15%
Water: 67%

1 liter e 10 liter

PRODUCT DESCRIPTION:

BioFlav-X is a liquid composition that boosts a plant's own defense system and alleviates the symptoms of stress and damage caused by an attack. The formula is centered around a citric acid extract. This extract has been shown to be highly effective in the control of a large number of pests, pathogens, moulds and viruses.

BioFlav-X is not designed to kill the pests but to deter and discourage them from attacking the plant. Field trials have shown parasitic nematodes moving away from the plant's rhizosphere.

RECOMMENDED APPLICATION RATES

Min 2 Ltr/Ha in 600 L tr of water at weekly intervals. Can be used as plant and soil bio stimulant; Wash in soil applications with 2-5 MM irrigation direct after application. (depending on soil type) Flower bulb dipping in combination with 50% classic chemicals has shown effective results; for detailed application advise, please contact your distributor.

SAFETY PRECAUTION

Keep out of the reach of children, read the MSDS sheets carefully before use. Do not combine BioFlav-X in the spray tank with pesticides or fertilizers unless prior use has shown the combination is physically compatible, effective and non-injurious under local conditions.
