BioFlav-X

A natural solution to both abiotic and biotic attack

BioFlav-X is a liquid composition that boosts a plant's own defense system and alleviates the symptoms of stress and damage caused by an attack. The formula is centered around a citric acid extract. This extract has been shown to be highly effective in the control of a large number of pests, pathogens, moulds and viruses.

BioFlav-X is not designed to kill the pests but to deter and discourage them from attacking the plant. Field trials have shown parasitic nematodes moving away from the plant's rhizosphere.

PRODUCT DETAILS

- Improves plants natural defense system
- Alleviates symptoms of stress and damage caused by an attack
- Does not kill but deters and discourages pests
- Environmental friendly
- Stimulates plant growth, health and productivity

DIRECTIONS FOR USE

Min 2 Ltr/Ha in 600 L tr of water at weekly intervals. Can be used as plant and soil bio stimulant; Wash in soil applications with 2-5 MM irrigation direct after application (depending on soil type).

Flower bulb dipping in combination with 50% classic chemicals has shown effective results; for detailed application advise, please contact your distributor.

Available in packages of 1L
