# PROMOTE

## Activate your plants defense system

**Promote** is a unique composition of natural plant extracts, denaturalised extracts and specially selected organic compounds, designed to trigger the plants own defense mechanism by using natural plant hormones and denaturalised extracts. The components 'trick' the plant into thinking it is under both biotic and abiotic attack and needs to use the ingredients within **Promote** to massively boost its own immune system. As a result, the plant is far better equipped to withstand any attack and can spend more energy on growing, developing a much denser sward, a significantly greater root mass and visibly higher chlorophyll levels, resulting in a synergistic effect.

### PRODUCT DETAILS

- Improves plants natural defense system
- Increases mineral uptake from the soil and into the plant
- Relieves stress in plants caused by extreme weather conditions, pests and diseases
- Increased root mass development
- Increased turf density and quality
- Provides great results in horticulture

### DIRECTIONS FOR USE

20 L/Ha in 300 - 600 L of water every 2 weeks for the first 3 treatments, followed by 20 L/Ha every 3 weeks.

Available in packages of 10L, 208L en 1000L  
Please check availability with your distributor

**COUNTRY OF ORIGIN:** Ireland
