EC METER FIELDSCOUT

Direct Soil EC Meter

The Fieldscout EC Meter makes instant and accurate EC measurements. EC is an important diagnostic indicator for identifying soil health issues. High salt levels will cause toxicity, infiltration problems, a decrease in beneficial microorganisms and an ineffective nutrient uptake. With the Fieldscout EC meter it is possible to test the salt content of water sources used for irrigation and tank mix solutions.

PRODUCT DETAILS

- Professional grade meter - Patented
- No need to prepare samples - simply sample through the profile
- Range : 0 to 19,9 mS/cm (+/- 1 % accuracy)
- Patented paired sensor tip provides maximum soil-sensor contact and higher accuracy
- Automatic temperature compensation, long lasting and waterproof
