# Turf Power 3-0-4

## Organic plant based fertility product

**Turf Power** is a fertility product that can be applied to all ornamental plants, trees, turf, lawns, landscape shrubs, and flowers. When used as directed, **Turf Power** is safe to plant and can be applied at any time of the year as part of a complete turfgrass and ornamental plant fertility program. **Turf Power** is easy to apply through standard spray application equipment to all turfgrass areas.

### PRODUCT DETAILS

- Enhances availability of plant nutrients
- Increases water holding capacity of the soil, reducing irrigation frequency and increasing stress tolerance during harsh conditions
- Makes nutrient delivery more efficient over an extended period
- Enhances soil fertility, by fostering the development of complementary soil micro-organisms
- Accelerated root initiation, establishment & development
- Encourages bridging into native soils and nutrient uptake
- On-going tests show a potential mode of action interferes with pathogens' access to plant root
- Increases size, quality and yield

### DIRECTIONS FOR USE

Golf, Sports & Lawn Turf

Apply 25L/Ha at 4 week intervals during the growing season. For thatch reduction, apply 50 L/Ha at 4 week intervals. For Horticultural and general applications, mix **Turf Power** at an 8% dilution on a weekly basis. For improved germination, apply 50L/Ha direct after seeding or at transplant.

Available in packaging of 20L
